

# Supercharge your Redwood experience

## Redwood RangerAI:

Practical, secure, integrated AI — purpose-built to enhance the complete automation lifecycle

### Effortless expertise on demand:

Instantly learn and ask complex how-to questions with specifically trained conversational AI.

### AI-powered workflow operations:

Use AI to troubleshoot, document, build automations and operate the platform.

### Accelerate new-hire onboarding:

Allow junior staff to operate with the confidence of a senior expert, freeing up specialized resources.

### Clear the automation backlog:

Enable a wider range of users to create custom jobs, accelerating your response to new business requirements.

### Drastically reduce Mean Time to Resolution:

Empower operations teams to resolve issues in seconds, ensuring greater stability for critical business processes.

### Improve quality and collaboration:

Reduce errors from manual scripting and create a clear, consistent foundation for team collaboration.

## For all Redwood Software solutions

### Learning Assistant

A conversational, AI-powered search and learning tool embedded in documentation

Empower your teams to self-serve, find solutions, solve problems and learn new platform capabilities faster to get back to work without delay.

### Support Assistant

An AI-powered assistant that provides immediate responses to your queries

Resolve complex issues faster with quick answers from an AI model trained by Redwood's Support team on an extensive knowledge base. Get the help you need, right when you need it.

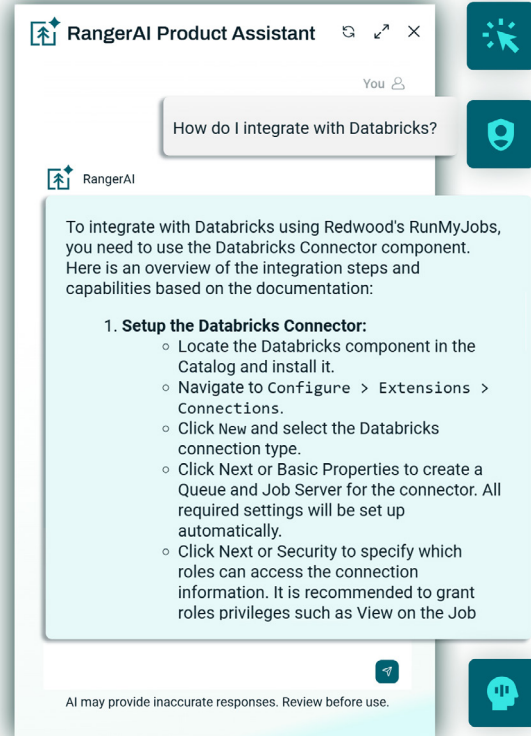

# Integrated into RunMyJobs by Redwood

## Product Assistant

**An intelligent, in-app assistant designed to empower your teams with specific and valuable guidance**

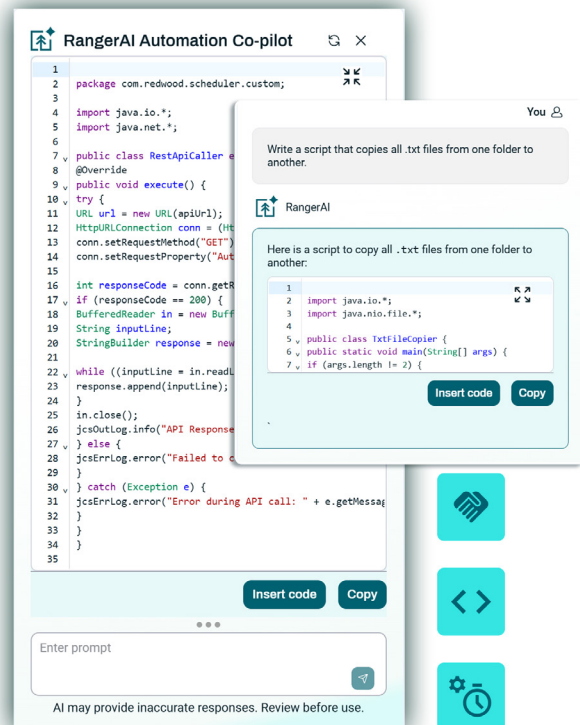

- Troubleshoot in seconds with instant, context-aware advice for job errors at the click of a button
- Ask complex how-to questions and learn RunMyJobs faster in a conversational interface

## Automation Co-pilot

**An AI partner embedded into the development workflow to write scripts and automatically document your automations**

- Automate faster with natural-language prompts to generate scripts in Java and Redwood's built-in platform scripting language
- Automatically generate documentation for job and workflow configurations with a single click

Limited usage of Redwood RangerAI capabilities is included in RunMyJobs, and additional capacity is available for purchase.

# Redwood RangerAI is ...

## Secure and controlled by design

Your data remains private. Redwood only passes minimal, task-specific data (like an error code), ensuring your sensitive business information is never exposed.

## Hyper-accurate and specific

Redwood's AI models are trained for your specific use cases, providing relevant scripting and error resolution advice, unlike generic AI tools.

## Natively embedded

Redwood RangerAI enhancements are woven into the platform for a frictionless user experience that enhances productivity without disruption.

## Explore the value of practical AI

Find out more about moving from automation to autonomy with the help of RunMyJobs and its new Redwood RangerAI features.
